SAY NO TO PLASTIC & PROTECT THE FUTURE

Dear Parents,

Plastic pollution is one of the biggest environmental threats we face today. The harm caused by plastic waste is far-reaching, affecting not only our planet & wildlife but also the human health. To create a better and safer future, we must reduce the use of plastic and adopt the following sustainable alternatives: -

- Use cloth or Jute bag instead of plastic bags.
- Switch to reusable water bottles, kitchenware, travel kit & food containers instead of buying plastic ones.
- Avoid plastic straws and cutlery & opt for steel wooden or biodegradable alternatives.
- Say 'No' to Plastic wrapped snacks and choose eco-friendly packaging.
- Avoid plastic decoratives & opt for paper made material, natural plants & flowers to grace the occasion.
- Support eco-friendly and ethical brands.

Your cooperation in this endeavour is crucial. By collectively adopting and incorporating these small changes in our daily lives, we can create a safer and healthier future for our children.

Regards,
