Go green, Say No to Single Use Plastic!

Plastic waste has become a pressing environmental concern with far reaching impacts on our ecosystem including soil, air, water and living organisms. Together we can make a significant impact and contribute to a cleaner and greener environment.

To achieve this goal, we urge all academic and administrative faculty members to refrain students from using single use plastic and work collectively to mitigate this environmental challenge and create a plastic free campus.

Suggestive alternatives: -

01. Reusable water bottles, tiffin boxes and pencil boxes.
02. Reusable bags made from material like cotton, jute or canvas.
03. Wooden or steel cutlery, paper straws, stirrers, etc.
04. Paper covers for note books.
05. Recycled art material for decoration and projects.
06. Paper bags instead of plastic carry bags.
07. Bamboo toothbrushes.
08. Beeswax wraps for food storage.
09. Eco-Friendly waste management.

Let's work together to make our school a '**Plastic Free Zone**' and model for sustainable practices.

Regards,
